1. Receipt is acknowledged of the prior art information disclosure statement and the priority papers filed October 12, 2001.

2. Claims 1-17 are pending in this application.

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a process for the enzymatic preparation of hydroxy fatty acid esters, classified in class 435, subclass 134.
- II. Claim 16, drawn to a technical mixture of hydroxy fatty acid esters, classified in class 424, subclass 65.
- III. Claim 17, drawn to a formulation containing a regioselective hydroxy fatty acid, classified in Class 554, numerous subclasses depending upon the compounds.

4. The inventions are distinct, each from the other because:

Inventions I and II do not require the specifics of Invention III.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process of making e.g., by organic synthesis.

Art Unit: 1651

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter and the search required for one invention is not required for the other invention, thusly the restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. This application contains claims directed to the following patentably distinct species of the claimed invention:

A. Whereby the fatty acid component is selected from the group consisting of

- i. Hydroxy fatty acids;
- ii. Hydroxyfatty acid alkyl esters;
- iii. Combinations of I and ii.

B. Whereby the polyols is selected from:

- a. polyols of ethylene glycol or polyethylene glycols;
- b. glycerol;
- c. condensation products.

C. Whereby the enzyme is selected from

- x. lipase;
- y. esterase;
- z. protease.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1651

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
